

# Ecolift BIN LIFTER

A lift-and-tilt crank handle operated unit for lifting and tipping wheelie bins into skip bins. Suitable for schools, factories, retail outlets and offices.

Eliminating all lifting from the process of emptying wheelie bins into skip bins, the bin is lifted by simply manually rotating the crank-handle—protecting the user from costly back injuries associated with lifting heavy loads above shoulder height.

## Typical applications

Suitable for schools, factories, retail outlets and offices.

## Specifications

<b>Lifting</b>	
Capacity:	50 kg
Mechanism:	Lift-and-tilt
<b>Recommended use</b>	
Per person per day:	6 lifts
<b>Bin compatibility</b>	
Wheelie:	80, 120, 140 and 240 litre
Skip:	Up to 1500 mm
<b>Operation</b>	
Method:	Manual winding crank-handle
Time:	45 seconds
<b>Cable length</b>	3.2 m
<b>Dimensions (L/W/H)</b>	1200/800/2000 mm
<b>Highest tip point</b>	2800 mm
